

Terra Green Energy, LLC

BENEFITS IN THE INDUSTRIAL MARKET

Who?

- Companies that use coal as a thermal heating fuel face particular emissions issues such as mercury, SO_x, or NO_x
- Companies that currently use fuel oil, propane, or natural gas and desire to limit exposure to price volatility
- Desire to reduce their carbon footprint – pending Green House Gas (GHG) legislation

GreenCoal™ torrefied biomass can provide a solution to the issues of GHG emissions and price volatility.
